Supplementary Table 2. Summary of criteria for systematic literature review data extraction

| Categories | Relevant criteria |
|------------------------|---|
| Study details | <ul style="list-style-type: none"> • Study design • Study objective • Study setting • Study methods • Study phase • Study population • Inclusion/exclusion criteria • Primary/secondary endpoints • Concomitant medications • Study duration • Statistical methods • Author's conclusion and comments |
| Treatment details | <ul style="list-style-type: none"> • Treatment arms • Treatment dosing details (including average dose received and route of administration) • Number of patients (per treatment arm) |
| Information to extract | <ul style="list-style-type: none"> • Relevant patient characteristics of patients who discontinued (age, sex, EDSS score etc.) • Proportion of patients discontinuing DMT <ul style="list-style-type: none"> ◦ Proportion discontinuing due to any cause ◦ Proportion discontinuing due to adverse events ◦ Proportion discontinuing due to lack of efficacy • Reasons for discontinuing primary DMT • Patient characteristics who discontinued the primary DMT • Proportion of patients switching to alternate DMT • Type of alternate DMT • Time to treatment failure • Time to switch • Time to treatment discontinuation • Treatment satisfaction questionnaire • Disease characteristics after drug discontinuation |

DMT = disease-modifying treatment; EDSS = Expanded Disability Status Scale
